

Mastery Tests

neo+

neo ρ +

neoJr+

All **neo** courses include a series of **Mastery Tests** to help teachers evaluate a learner's progress, and to adjust correct placement in the neo curriculum. The tests confirm that students have successfully acquired the unit material, thus correctly managing students' progress in their voyage towards the next Certification goal.

Learners can study optional review lessons before taking the **Mastery Test**. If they take the test and do not attain the 84% passing score, they are required to study review material selected by the Artificial Intelligence to move forward.
