

A neoClassroom Series Course for Middle School and High School English Language Learners

English Language Learners learn faster with neoPrep+

neoPrep+ is designed for English language learners who need to succeed in an academic environment. Its comprehensive curriculum develops general, school subject, and social-situational English skills that give learners confidence in their reading and verbal abilities. With neoPrep+, students are able to reach fluency faster than with traditional programs.

11 Skill Levels

Using the neoStudy tool, students 11 years old and above can study 11 levels that correspond to the Common European Framework of References for Languages (CEFR). Learners can complete as many or as few levels as they need to fulfill your school's English requirement. Levels start at Pre-A1 for those with no previous knowledge of English and end with C1-Bridge for learners planning for advanced academic study or professional work in English.

Course Structure

Each skill level consists of a variety of lessons that students must master in order to pass the level's Certification Test. The type of lessons and exercises revolve around school subjects like math, history, or science, and includes social-situational English that is relevant to tweens and teens.

Presentation Lessons introduce new language through a narrative, a conversation, or a mini-lecture on an informational subject. All content is introduced in a clear context with visual support. These lessons follow a 5-step process that facilitates learning: Preview, Repeat, Record, Speak, and Review.

Reinforcement Exercises allow learners to practice the language from the presentation lessons. These exercises focus on comprehension of individual sentences. The types of exercises included in each lesson vary based on the difficulty of the CEFR level.

Each level includes one or more of the following:

- + Reading Exercises
- + Vocabulary Exercises
- + Grammar Focus
- + Sentence Focus
- + Dictations
- + Memory Games

Builds Academic Reading Skills

neoPrep+ builds important reading skills that will prove invaluable in middle school and high school. These skills will also help prepare your students for university. Skills include reading for main ideas, skimming, scanning, understanding vocabulary in context, using context clues to decipher meaning, rapid word recognition, and decoding.

Assessment Test

neo's Placement Test starts your learners in the right unit for their current skill level.

Mastery Tests

Artificial Intelligence (AI) ensures that each student advances to mastery at a pace that is appropriate for them. Then neoPrep+'s Mastery Tests confirm a student's mastery of the material within the lessons. Passing a Mastery Test gives students instant access to more advanced lessons.

Certification Test

At the end of each level, learners take a comprehensive test that covers key language and concepts from the entire level. Learners receive internationally accepted certificates for each CEFR level completed.
